

Fan powered terminal users have assumed for years that certain things were **IMPOSSIBLE**. Customers asked for **Factory Pre-set Fan Cfm**. The industry asked for **Reduced Energy Consumption**.

While others were trying to understand the question . . .

Nailor Delivered the Answer

Nailor has shipped the first terminal units ever utilizing this revolutionary new technology.

Nailor's optional new motor technology enables:

- Factory preset fan cfm, regardless of use or installation conditions.
- An extremely long motor lifetime.
- Highest energy efficiency available.
- Soft start and speed ramps.

STANDARD UNIT FEATURES
