

Model Series 38FZ • Performance Data

EPIC ECM Motor Fan Curves - Airflow vs. Downstream Static Pressure

Electrical Data

Unit Size	Motor H.P.	EPIC ECM Motor FLA		
		120/1/60	208/240/1/60	277/1/60
1	*	3.7	1.9	1.9
3/3S	*	5.8	3.4	2.9
3H	*	6.3	4.0	3.7
5	*	12.6	6.2	5.5

* The EPIC ECM is a variable horsepower motor. Refer to Selectworks schedule for actual power consumption. FLA = Full load amperage. All motors are single phase/60 Hz.

NOTES:

- The ECM is pressure independent and constant volume in operation at factory or field set point within the shaded area. Airflow does not vary with changing static pressure conditions. The motor compensates for any changes in external static pressure or induced air conditions such as filter loading.
- Airflow can be set to operate on horizontal performance line at any point within shaded area using the solid state volume controller provided.
- Fan curves shown are applicable to 120, 208, 240 and 277 volt, single phase ECM's. ECM's, although DC in operation, include a built-in AC/DC converter.
