

**MINIMUM SECURITY DOUBLE DEFLECTION
SUPPLY GRILLES AND REGISTERS**
STAINLESS STEEL • LATTICE FACE • LOUVERED BLADES
MODEL: SG-67DH AND SG-67DV

These models are suitable for minimum security applications where the location is either hard to reach, such as high walls or ceilings in day rooms, or where there is constant supervision. The actual size of the unit may have a bearing on its application if the grille size selected is small enough that physical removal and/or bodily entry would not be contemplated. These models are essentially the same as the corresponding **Nailor 6700 Series** grilles with the addition of a lattice face for additional security.

STANDARD CONSTRUCTION:

- Lattice Face: 12 gauge type 304 stainless steel with 13/16" (21) square holes on 1" (25) centers. 3/16" (5) fret bars. Other lattice configurations are available to special order.
- Grille or register is same as corresponding **6700 Series**.
- Blades on 3/4" (19) centers are individually adjustable.
- Front blades are horizontal (H) or vertical (V) with the rear blades having the opposite orientation.
- Optional stainless steel opposed blade damper has a screwdriver slot operator.
- #4 Brushed Satin Polished finish is standard. AW Appliance White is optional.
- Screw holes provided in face plate. Tamper proof/security screws by others to suit local requirements.
- Available in sizes 6" x 4" (152 x 102) through 48" x 24" (1219 x 610) in one piece construction.

SCHEDULE TYPE:		Dimensions are in inches (mm).
