**DESCRIPTION:**

1. Material: Corrosion-resistant steel.
2. Specially designed for high airflow applications at minimum NC levels such as theatres, auditoriums and other high ceiling applications, where conditions and floor to ceiling height are variable. Effective for heating and spot cooling. Radial vanes in the adjustable face damper permit air pattern adjustment from full horizontal to approx. 50/50 horizontal/vertical. Full adjustment requires only a half turn and is easily accomplished from the floor using the ring operator and a pole (by others). The horizontal portion has a 360° discharge pattern. The vertical portion provides a true and long downward projection.
3. The diffuser features a stamped one-piece outer-cone which eliminates mitered corners and a heavy gauge inner face panel with a hemmed edge for strength and a clean appearance.
4. Standard finish is AW Appliance White. (Select color from finish option).
